Established the Department of Al System Development

Worked jointly with Panasonic on the development of computer-controlled robots

The first computer developed by Kobe Denshi in Japan

The first computer textbook published by Kobe Denshi

Liu Zhanshan, Chinese ambassador, gave a speech on the 50th anniversary ceremony.

# Department of Japanese

The purpose of this department is not only to improve the Japanese language skills of beginner level students, but also to develop the ability of each student to stand on their own with the international community.

The Department of Japanese seeks to improve language skills to the level required for studying at higher education institutions and also develop the communication skills necessary to be active as professionals in business settings.

Rather than simply forcing to students to accept learning as reading textbooks and digesting "Japanese", the purpose of this department is to foster true global people who can use language as a tool of their own.

### Courses

2 Years Course	Enrollment in April	Over two years, students learn Japanese from the basics to applications and acquire a wide range of language skills. The goal is to get N1 of JLPT.
1 Year 6 Months Course	Enrollment in October	From the basics to everyday Japanese, you will learn the Japanese necessary to study wherever you end up. The goal is to get N2 of JLPT.

### Content of study

	Level	Learning Hours	Content

# Collaboration with Industries

Kobe Denshi has been nurturing excellent professionals for industries for over 60 years so that it has good relations with industries. Famous companies come to Kobe Denshi to hold seminars helping students understand the trends and the developments of industries. The seminars contribute to high employment rates of Kobe Denshi.

# Students of Japanese department join the semiars hold by famous companies.

# Nearly 400 companies in a year come to Kobe Denshi for special sessions and enterprise seminars.

# 神戶情報大學院大學 Kobe Institute of Computing - Graduate School of Information Technology

Department of Information Systems Degree: Master of Science in Information Systems(Professional)

## ICT professional course

### Features

ICT Professional course trains high level ICT human resources who can develop ICT systems and manage them. You can learn know-how and skills from the foundation to specialty in ICT field in 2 years regardless of what you did in undergraduate or in your business experiences.

You can aim to be a "High Level Engineer" who can play an active part in companies (eg: ICT Specialist, ICT Architect ICT Project Manager etc.) and a "Business Leader" who can

solve social problems using ICT. (eg: Business Innovator, Process Innovator, Social Innovator etc.) The ICT Professional course differs to ICT Innovator course. This course begins in April and all of classes are provided in Japanese. (Subjects to be offered are almost the same with ICT Innovator Course.) Most of students are Japanese or Asian foreign students for now.

Students without the necessary pre-requisite Japanese Language skills (N1 level Japanese language proficiency) can attend Japanese Language courses at our Department of Japanese before undertaking the ICT Professional Course.

### Admission

- Enrollment: April
- Language of instruction: Japanese
- Eligibility for application
- 1) Foreign applicants who completed 16 years of school education or who have a degree of bachelor or equivalent.
- ② JLPT N1 certificate (Japanese Language Proficiency Test) or equivalent
- (3) Foreign applicants who can afford expenses in school (for 2 years) including tuition fee, living expense and other expenses.
- The application eligibility will be examined. If you want further information about application eligibility, please contact us.

### Tuition (Japanese Yen)

Admission fee	200,000
Lecture fee	1,400,000
Facility fee	200,000
Total(first year)	1,800,000

Self-financed international students who enrolled in KIC with student visa may apply for KIC Financial Aid Scholarship(up to 600,000 yen).

### ICT innovator course

### Features

In order to develop skilled professionals, our faculty consists of experienced corporate pioneers from companies such as SONY and Panasonic who cooperate with a variety of researchers and education experts, to instill practical capabilities through group work, and simulated projects.

For challenges in the real world, various factors complicate progress, and for such problems, you need to have the power to discover their essence. In the curriculum of KIC, you will develop this power through "TANKYU Practice" exercises and "Specific Theme Research."

By taking ICT and social development-related lectures and working on solving actual issues beside government-sponsored students from developing countries, it is possible to learn international cooperation, social development, and social innovation.

The course is aimed at students from developing countries as well as Japanese students intending to work overseas. After completing the program, students can expect to work not only for NPOs, public institutions and as social entrepreneurs at home and abroad, but can also find employment in global companies, to play an active role in a wide range of fields.

### Admission

- Enrollment: October
- Language of instruction: English
- Eligibility for application
- (1) Foreign applicants who completed 16 years of school education or who have a degree of bachelor or equivalent.
- 2 Foreign applicants who can afford expenses in school (for 2 years) including tuition fee, living expense and other expenses.
- The application eligibility will be examined. If you want further information about application eligibility, please contact us.
